

## CONEXPO 2026: Sensei's First Overseas Exhibition

Our team recently returned from Las Vegas following a successful week at CONEXPO 2026. As Sensei Spare Parts' first overseas exhibition, the event provided a vital platform to engage directly with the North American market and gain firsthand insight into regional industry needs.

Throughout the fair, visitors and industry professionals showed strong interest in our wide range of solutions: our original-quality spare parts for Yanmar and Kubota Engines, as well as our extensive inventory of common rail injectors and components for Cat, Bosch, Denso and Delphi systems. The positive reception from the North American audience underscores the demand for reliable, high quality engine spare parts. We are translating this demand into action by laying the groundwork for several promising business partnerships that will support our growth and long-term presence in the region.

Thank you for making our first overseas expo a success. Stay tuned for our upcoming fair schedule, we look forward to welcoming you to our booth again soon.

## Sensei's Second Year at Bosphorus Boat Show

2026 marked Sensei's second year at the Bosphorus Boat Show | On Land exhibiton. During the event, held at the Istanbul Expo Center from February 21–28, we had the valuable opportunity to connect with visitors and allow them to experience the quality of Sensei Spare Parts firsthand. Beyond reconnecting with our long-standing partner, we were pleased to establish many new relationships that will support our continued growth in the marine sector.
